

MELS™ Learning Management System

A digital learning platform (LMS) is critical to manage training

-coordinate activities to develop employee competencies and skills!

About MindIT:

MindIT is an e-learning company that assists businesses and organisations in connection with skills development through effective use of technology. Our technology and our working methods have been developed for over 10 years. We offer:

Content Production

We have extensive experience with production of e-learning courses and can tailor learning initiatives to your business, and various user groups' skill needs. All our courses are developed according to the SCORM standard.

Consulting

We help our clients' to define, plan and carry out activities in connection with implementation of e-learning.

System Solutions

MindIT has developed MELS™ that enables distribution of learning content to a defined target group. We manage the learning portal so that it removes the need for IT-installations at the client site.

Among our clients are Seadrill, Archer, KCA Deutag, Statoil and Aker Solutions.

A digital learning platform (LMS) is a Web-based system to manage users, courses and skills.

Benefits of implementing a digital learning platform:

- Unify learning environments for consistent and targeted training
- Manage employee competencies and plan for future needs
- Reduce the cost of training

We have developed the digital learning platform (LMS) MELS™ to offer tailor-made solutions to our clients. Each user of MELS™ log in with a unique user name and password.

Key features MELS™:

- Web-based makes flexible course participation and effective management
- SaaS, removes the need for IT-installations at the client site
- Integrate video, text, audio, and rich multimedia with CoursePlayer
- Built-in reporting tools
- SCORM and AICC-compatible

Our learning platform MELS™ is used daily in organizations with worldwide operations. With our own CoursePlayer it is easy to develop interactive e-learning courses.

We customize MELS™ to your business needs. Give us a challenge!
